

A note from the CEO

You haven't heard from us often enough with company updates, and we plan to change that via our quarterly newsletter, aptly named 'The Charming Shortcut'.

Why may you ask?

Well, Amulet, by another name is a good luck charm, and I'm sure I don't need to explain a Hotkey!

So, here we have our first edition that aims to bring you the latest news, product updates, events and so on.

First off, I'd like to say thank you for continuing to be part of the Amulet Hotkey community. Your ongoing custom and partnerships have meant the business continues to be successful and we are able to invest in innovations that will, ultimately, benefit you.

It's been some months now, but you have probably noticed our new website and logo? This is a welcome step on our evolution to a brand we think reflects the company we are today. For any partners who need a copy of our new logo, you can reply directly to this email, and you'll reach our marketing manager.

Scroll on to read the latest news and keep an eye out for The Charming Shortcut dropping into you inbox each quarter!

[CoreStation CX6520 blade workstation that maximizes density for ultimate performance](#)

Designed to deliver dedicated and powerful performance with professional processors, graphics, and large memory to handle large datasets and demanding workloads.

The CX series workstations are the next generation of centralized and virtualized workstation in our Agile Work Environment solution suite. Our solutions empower customers to architect tomorrow's workplace to rapidly respond to changes, handle complex workflows, and create and deliver ideas faster that transforms competitive capabilities.

Compact and feature rich to support remote, hybrid and collaborative working

In July we announced the next generation in our DX series clients – the DX1600 and DX1300. Our DX series clients are designed to deliver performance and reliability, giving you a flexible, secure and easy to manage end point that give an optimal user experience. What separates the two options is the DX1600's enhancements to support the most demanding workloads, while the DX1300 is intended to be plug and play as a rapidly deployable option.
