# The Charming Shortcut

## bringing you the latest updates from Amulet Hotkey

**The trusted choice for power, agility, and security for mission critical and data intensive workloads**

## A note from the CEO

Welcome to the second edition of The Charming Shortcut – it's been a busy quarter so scroll on to catch up with what has been going on at Amulet Hotkey.

If anyone missed the first edition where I explained the newsletter names sake – well Amulet, by another name is a good luck charm, and I'm sure I don't need to explain a Hotkey!

Most significantly, we recently lost our dear friend and colleague Andrew Jackson. He was a bright, fun, intelligent loyal friend and colleague who was greatly liked by all who knew him. Taken way too early, we will miss him hugely.

With the importance of relationships in mind, we are honored to have been named partner of the year by Leostream, whom we have been working with for many years, and look forward to many more!

To you, your friends, and your families, I wish you a very happy festive season and new year.

Don't forget that you can also keep up with the news by following us on LinkedIn.

Stewart Holness
Executive Chairman

## News

### DX series client is now IGEL ready

From Tom Cole, Director of Product Management:

"It's great news that our latest DX series clients are IGEL Ready. We are able to offer choice from the best OS providers, which not only enhances the DX1600 & DX1300, but also means the customer can choose what works best for them".

### Leostream Honors Amulet Hotkey as Inaugural Partner of the Year

In October, Leostream,™ our partner and leading provider of enterprise-grade remote access solutions, named us as its first Partner of the Year. The award is designed to recognize premier resellers for their success in delivering innovative remote access management solutions based on the Leostream Platform to customers worldwide.

### CoreStation RX350: Economic and efficient, accelerated workstation for secure access anywhere

Introducing the lasted addition to the CoreStation RX series: A powerful, custom engineered 1U rack workstation with server-class management

The Amulet Hotkey CoreStation RX350 packs professional workstation performance in a compact data center optimized platform that has dedicated and powerful processors.

---

### Watch our Power Users Webinar OnDemand

We were joined by our partners Stratodesk and Leostream to discuss the complexities of enabling Power Users to work remotely.

Out of the box options are not usually suitable for the power user so organizations need an infrastructure that can handle the variety of user types and workloads. Typical examples of power user organizations are often in financial services, defense and media & entertainment.

Listen back OnDemand to hear from the team about the business drivers and infrastructure solution that can respond to data intense challenges.
